(v) Currency of Sanction to Estimates.

40. The following statement gives the time limit up to which estimates may be regarded as current. At the end of the period fixed, the estimates should be regarded as having lapsed and any outlay incurred thereafter, brought under objection and regularised by renewal of sanction by competent authority. The period fixed for the currency of an estimate falling under Class 5, should invariably be noted for the information of the Accountant General in the monthly returns of sanctions communicated to him.

Note.-- No outlay should be incurred on or provisions proposed for works, the sanctioned estimates of which are not current, the time limits prescribed having been exceeded, unless they are renewed by competent authority. Renewal of sanction is not necessary when a closed work account is reopened merely for rectification of errors.
